Part B. for February 1905

SUBJECT.

Improvement of No. II drainage area
of the Mysore City.

FI 1905.

Improvement of No. II. Drainage area of the Mysore City.

- 1 From the Chairman, Mysore City Trust Board, No. 183, dated 27th August 1904.
Submits a declaration and statement showing the particulars of certain properties proposed to be acquired for the purpose of improving No. II Drainage area.
- 2 From the Secretary, General and Revenue Department, No. 2218, dated 17th September 1904.
Informs him that formal sanction to the project for the improvements of No. II. Drainage area is necessary before the declaration and statement for the acquisition of properties in Blocks Nos. 12 and 13 could be published, and asks him to take action in the matter as quickly as possible.
- 3 From the Chairman, Mysore City Trust Board, No. 159, dated 31st October 1904.
Submits for sanction the project amounting to Rs. 5,43,819, for the sanitary improvements to be carried out in No. II. Drainage area of the Mysore City.
- 4 From the Chairman, Mysore City Trust Board, No. 203, dated 21st January 1905.
Reports that up to date a sum of Rs. 1,08,662 has been spent under the circumstances reported in Serial No. 3, and requests early sanction to the project.
- 5 From the Secretary, General and Revenue Department, No. 6772-3, dated 6th February 1905.
Sanctions the project for Rs. 5,43,819, with the remark that the original project and the plans of the silt traps and "Automatic Flushing Tanks" should have been submitted.
Endorsement to the Comptroller, No. 6772-3, dated 6th February 1905.
Forwards copy of the above.
Endorsement to the Chief Engineer, Memo No. 6774, dated 6th February 1905.
Forwards copy of the above.
- 6 To the Chairman of the Board of Trustees for the Improvement of the City of Mysore, No. 6804-118-6-M.L., dated 7th February 1905.
States that the declaration and statements referred to in Serial No. 1, will be forwarded to the Compiler, Mysore Gazette, for publication.
- 7 To the Compiler, Mysore Gazette, No. 6805-118-6-M.L., dated 7th February 1905.
Forwards for publication the office draft of the declaration and statements referred

BRIEF ABSTRACT OF LETTER.

Submits for publication declaration and
statements for the acquisition of properties in Blocks
Nos 12 and 13 pending formal sanction to the project
for the improvements of the No II drainage area on
the ground ^{that improvement} in the said blocks is urgently called for
to prevent the recurrence of plague.

NOTES AND ORDERS.

The Chairman refers to previous
sanction given to the project for the
improvements of the No II drainage area
of the Municipality. No such sanction has
been given but the provision

Serial
No.

2

made ~~provisional~~, in the current year's budget of the Trench Board was passed. Perhaps the Chairman considers the orders passed on the Budget estimates as provisional sanction

2 Under Rule 18 (1) (a) of the City of Mysore Improvement Regulation the resolutions and statements now submitted can be published only after the project is sanctioned by the Board submitted for orders

H.B. Singh
8.9.04

J. Ramalingam

9/9/04

3. Submitted to the Dewan Sahib thro' the 1st Councillor. May we ask the Chairman first to obtain sanction for the execution of the work, referred to?

14.2.1904

4 The law contemplates no ^{in such cases} provisional sanction. A provision in the Budget is not

The current year's budget of
the Trust Board contains a pro-
vision of Rs 67,000/- for expenditure
on this project during the current
financial year. In para 7 of the
letter under disposal the Chairman
states that Rs 5,74,88 have been
already expended & that unless
extra grant is made available
by reappropriation the opera-
tions now started and in full
swing will have to come to a
stand still. The Chairman plans

2

Serial
No.

Should have reported what extra money would be required and how the same could be met. Savings to any large extent does not seem to be possible as funds have to be provided by reappropriation for the formation of the Doddabholagore and for the purchase of Donlon's stone ware pipes. In para 5 of the letter items for which suppl estimates are necessary are enumerated.

Before according sanction to the project may it be forwarded unofficially to the Secy to the Govt of H. H. the Ma. Karaja in the P. W. D for scrutiny of the estimates and for his opinion on the project?

Submitted for orders.

OFFICE NOTE

Revised estimate for Drainage and other works
in No.2 Drainage Area.

Mysore City.

It would seem from the comparative statement
of Excesses and savings (slip A) submitted by the
Chairman, that out of the total excesses on the
original estimate prepared by Mr.D'Cruz and sanc-
-tioned by Government, of Rs. 91,565 that the ex-
-cesses are as under:-

(1) Excess owing to increase in rates-----	41,685
(2) Excess on new works unprovided for in original estimate-----	33,287
(3) Excess due to modifications in design-----	5,263
(4) Excess due to insufficient pro- -sion in original estimate-----	6,834

Total Rs.	88,069
(5) Contingencies at 5%-----	4,366

Total Rs.	92,430
Deduct savings-----	865

Grand Total Excesses	<u>--91,565</u>

Thus the bulk of the excess over the
original estimate is due to (1) increase of rates
and (2) new works.

(1) As regards increase of rates it will be
seen from the statement (slip B) prepared in this
office that it has been found desirable to use
fine, machine ground surkhi mortar for the plaster-
-ing to the open drains and to render the plaster
smooth with cement. The excess on this item alone.

Vol 7-10 1189.1925-5

8

alone is nearly Rs.24,000. Of course this superior work requires a higher rate than for the ordinary mortar provided for in the original estimate but the extra cost is I think worth the money as the work will last much better and will probably require less outlay on annual repairs.

The plan of the proposed revised type of silt trap has not been forwarded: but I inspected some of those already constructed in Ittigegode, Nizarabad, &c and I think that the extra expense involved Rs.10,122 is mostly due to extra rates on account of machine-ground mortar and cement being used as in the drains before referred to, and for similar reasons the extra cost is worth the money.

Under " Storm overflows" and "Leaping weirs" the excesses are small and call for no remark.

" Automatic Flushing Tanks" excess Rs.721. The plan to be adopted has not been sent; the excess is probably due to rates on account of the use of superior machine-ground mortar; and to the extra cost of some improvement in the tumbler, as pointed out to me on my last inspection by Mr. D'Cruz at Ittigegode and if so this may be passed.

"Laying Stone waste pipes" The extra cost Rs. 3,720 is probably due to "poulton-ware pipes being used instead of Burn and Co's as Burn and Co were unable to deliver the pipes in reasonable time; this may be passed. Under "Man-holes", "Septic Tanks" and "Improving the main Drainage Tunnel" The extra cost is probably due to increased rates for machine-ground mortar and may be passed for reasons already given above.

I am unable to say why any increase of rates has been necessary for the construction of "latrines" and "Dust-bins".

Change in design is slight, & the cost is due to rate for a class of work, and there is no additional silt traps and for the Residual work. This may be passed

10-1-05

Revised plan type has been approved.

10-1-05

Jul 7 No 1189.1902.5

9

(2) New works excess Rs.33,287

Nearly Rs.13,200 of the excess is due to extra length of the drains now provided for. This is due in a great measure to the lengths of drains provided in the original estimate having been measured off the maps, without taking into consideration the ¹⁶undulations and irregularities in the ground; and to provision now being made for drains in some extra "small gullies" this may be passed.

Repairing Purchas drain- Rs. 500/-
this is very desirable.

Earthwork for cutting and grading
roads-----2,278/-
this is necessary.

Earthwork. Lowering Sayaji Rao's Road --900
very desirable.

Removing flat stones of existing drains
and Resetting them-----8,114/-
this is necessary.

Filling in Purnaiyah's nullah 8,300
near the Puchihat police Station
This is very desirable.

(3) modifications in design

Excess Rs-----6,263

The proposed modifications are desirable.

(4) Insufficient provisions in original
Estimate-----6,834

Excess (Rs.2,332) is due to extra rates and quantities in excavation of drains and may be passed.

Rs.2,750. Repairing and improving existing
in
flood water main drain. I am not a position to

Office of the Chairman of the Board of Trustees,
for the Improvements of the City of Mysore

Dated, Mysore, $\frac{27}{31}$ August 1934

From

D. Sitaram Rao Esq.,
Chairman of the Board of Trustees,
Mysore City Improvements.

To

B. K. Venkatavarada Iyengar Esq.,
Secretary to the Govt. of H.H. the Maharajah of
Mysore, General & Revenue Departments.

Sir,

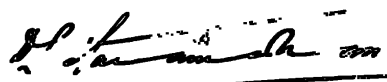

Referring to the provisional sanction accorded by the Government of H.H. the Maharajah of Mysore, for the Improvements of No. II Drainage area of the Mysore City for which a sum of Rs. 67,000/- has been provided in the current years Budget, I have the honor to submit herewith Registersⁱⁿ shewing the description, area, and other particulars of the properties proposed to be acquired for the purpose, and to request that they may be ordered to be published under your signature in three consecutive issues of the Mysore Gazette, as required by section 18 of Regulation III of 1903, pending formal sanction to the project. As it is desirable that improvements in the area which is hopelessly insanitary and highly congested should be effected soon to prevent the recurrence of plague, it is requested that arrangements may kindly be made for early publication of the declaration now submitted.

I have the honor to be,

Sir,

Your most obedient servant,

B.R.

Chairman.

Submitting the project for the Sanitary Improvement to be carried out in

1st 2. Drainage Area of the Mysore City for other

ing the sanction of Government.

C. A description of the area, the No. of Blocks into which it is divided, and the improvements proposed in each Block were duly noticed in the Mysore Gazette of 11-1-34 and in three successive issues in accordance with G.O. 6(1/3) of Regulation III of 1928 and copy of the same was forwarded to the Deputy Commissioner and President of the District Commission as per G.O. 16(1/a). A copy of the notification

Notification and a copy of the representation for the President of the Municipal Commission. In the scheme are enclosed for perusal.

3. A copy of letter No.44 dated 7th September 1953 from the Mysore City Sanitary Improvement Committee to the President of the Mysore City Sanitary Improvement Committee describing graphically the existing condition of the area with an expression of their views on the project prepared by Mr. D'Gruze for the improvement of the area is enclosed for reference. The report of Mr. D'Gruze that accompanied the Original Estimate is also enclosed. This report deals fully on all the Engineering details involved in the preparation of the Estimate and it appears to be unnecessary to traverse over the same ground again. But wherever marginal figures are considered necessary they are inserted.

4. The enclosed estimate is based on the rates at which material items of work are being executed at the other areas of the Town and is an explanatory comparative statement showing increase and savings over the original Estimate is also enclosed for ready reference.

The Estimate is made up of the following items:-

I. Expenditure for the acquisition of the properties to effect the General Improvement proposed as indicated above up to Rs.12,57,000/-

II. Expenditure (1) The construction of a 10" dia. section drain, Machine ground, South North, with requisite lot of 11ft cross, storm overflow, leading water and sub-
siding flushing tank. Rs. 2,10,000/-

(2) Supply of material for the construction of the drain and the 10" dia. section drain. Rs. 1,00,000/-

(3) The construction of the 10" dia. section drain.

That the above estimate is based on the rates and the material prices prevailing in the Mysore area.

7
 a regular sewer system at the house or at the intercept and
 eventually portion the sewer system; it and continuing it
 on to the septic tank up to... Rs. 6,000/-

(4) The construction of a Septic
 Tank at the end of the sewer from the "Purana" to
 utilize the sewage for farming purposes costs... Rs. 10,000/-

(5) The improvement of the exist-
 ing open storm water drain and the repair to the Purana's
 drain costs... Rs. 1,500/-

Total... Rs. 17,500/-

III Road.

The opening of new roads by the re-
 -moval of the debris from the dismantled houses; the lowering
 of existing streets to suit the grade, and the levelling of
 the ground behind Gopal Rao Road Frontage, forming and grave-
 -ling all the streets with. The removal and resetting
 of existing stone slabs, etc. etc. drains on the edge of
 the new concrete drains and providing necessary coverings
 and
 Rs. 10,000/- Road works at the openings of roads cost Rs. 10,000/-

IV. The Gopal Rao Road is proposed to be extended to
 to the Mangalaji New Street and a new road to the north is to
 -be made to the Mangalaji New Street. The road at the
 Sikkhar Road, Sikkhar a portion of the Mangalaji Road
 at the Mangalaji New Street is to be of Rs. 10,000/-

V. Minor works necessary at the proposed to be done at the
 construction of the new road and the new road is to be
 Rs. 10,000/-

The grand total of the works estimated for the
 up to Rs. 1,45,000/- including contingencies of 10%.

6. The cost of the works to be done at the
 -vision to be done in the accompanying estimate is Rs. 10,000/-

(1) "Lighting" for the new road and the new road is to be
 Rs. 10,000/- (2) "Lighting" for the new road and the new road is to be
 Rs. 10,000/- (3) "Lighting" for the new road and the new road is to be
 Rs. 10,000/-

be out full cover at the Social Services below buildings and
which were noticed in Mr. McGraw's report.

A separate supplemental estimate for the above
noted items and for any other items that may be necessitated
during the execution of work will be submitted.

6. From the enclosed statements of properties to be
acquired it will be observed that out of the total No. 1,200
only 370 whole houses will be required. In Block No. 2, 529
sanitary houses will be removed as it is found not possible
to improve the Block without entirely removing all the in-
sanitary dwellings. The cleared area will be redistributed
amongst the displaced population as far as possible to build
new houses on sanitary lines.

Within the prescribed period of one month after
the publication of the Notification in two consecutive issues (if
not served and the month is indicated as to serve or to
discontinue in the accompanying statement marked (1)). It may
be noticed from this statement that most of the property
owners agreed on favorable conditions to part with their
property for public purposes. People in need of houses and who
are in a position to build new houses after at the first in-
struction, others have asked the houses newly built by the
Trust at their cost after the condition of buying the
apartment in regulated installment. Others are willing to ac-
quire sites at the Ventilated Colonies.

*also have
been
submitted*

Houses have been noted for the acquisition of
of only those properties that are immediately required to
cover the emergency houses and it is intended to build
sanitary houses, subject for consideration under (1).

7. There is a provision of Rs. 50,000 in
yearly Budget, for full work, and the Government
it is intended it is feared that when extra is
available by reappropriation the acquisition may be
still some will have to be done to a large scale.

still.

3. A width of nearly 100 feet is being cleared behind the Syaji Rao Road frontage and the ground is being cut down to the basement level. It is to be decided how the frontage at a great cost and the fine ground now being offered are to be utilized. Looking to the central situation of the site it suggests that some of the Government offices having requisition may be located there by being furnished suitable structures utilizing the frontage to the best advantage.

File F. 118-2 (3)

MYSORE CITY IMPROVEMENT TRUST BOARD.

Notification dated 23rd July 1904.

No. II. DRAINAGE AREA.

It is hereby notified, in accordance with Section 16 (1) of Regulation No. III of 1903, for the Improvements of the City of Mysore, that a scheme for the improvement of that portion of the City described as No. II Drainage area has been prepared. The area lies generally between Bakshi Budan Khan's street and the Hospital road, and comprises the greater part of Leahkar and Mandi Mohallas.

It is bounded—

- (a) on the north by Bakshi Budan Khan's, Major Yakub's, Sivaprasad's, Gangaram's and G. Subbanna's streets,
- (b) on the north-east by the Church street meeting the road to the travellers' bungalow road, and the foot-path between the junction of the Church street and travellers' bungalow road, and Hale Nazarbad road,
- (c) on the east by the Hale Nazarbad road and the old Idga road,
- (d) on the south by Guler Subbanna's street, Court road, Kaliyama temple and Hospital roads,
- (e) on the west by Sayaji Rao road, Railway Station, and Silledar Lines and Stables.

This area is divided into 28 Drainage Blocks bearing Nos. 10, 11, 12, 13, (part of 18, 19, 21 and 22, and 29 and 30,) 31, 24, 23, 25, 6, 8, 7, 4, 5, 6, 26, 27, 23, 2, 3, as indicated on plans, and comprises the Silledar Lines.

The particulars of the Scheme, a map of the area and the statements specifying the lands and properties to be acquired may be seen at the Chairman's office, between 11 A.M. and 5 P.M. on office days.

The proposed improvements may be summarised under the following heads:—

- (a) the opening out of roads, lanes and open spaces, with a view to relieve congestion, facilitate drainage and conservancy, and to admit of sufficient light and air,
- (b) the demolition of insanitary houses,
- (c) the construction of drains,
- (d) the construction of latrines and the provision of other public conveniences,
- (e) the removal of insanitary blocks as indicated on the plans and incapable of improvement.

The details of widening the existing lanes and opening out of new roads and conservancy lanes in the several Drainage Blocks are noted below:—

Block No. 10.—Widening cross road No. 6, from Nala street to Jalagar's street, and No. 2 from Badubudike street to Anegundi Arsu street.

Continuing No. 7 conservancy lane to the west of Anegundi Arsu street to join Bakshi Budan Khan's street.

Opening a new conservancy lane No. 1 from Bakshi Budan Khan's street to Togari street.

Opening two new conservancy lanes No. III and IV as marked on plan.

Block No. 11.—Widening No. 3 road from Bakshi Budan Khan's street to Badubudike street. It is proposed to open ten new conservancy lanes to thoroughly conserve the area. They are consecutively numbered from two to eleven, and shown on the Block plan.

Block No. 12.—Opening three new conservancy lanes from Bakshi Budan Khan's street to Momthabooth street, and another across No. 9 new conservancy lane to Kaliyama temple street. Nine new conservancy lanes are also proposed to thoroughly conserve the area between Momthabooth street and Mandi market street. They are numbered 11, 2, 1, 3, 10, 12, 13, 5 and 6.

Block No. 13.—It is proposed to open out seven conservancy lanes between Bakshi Budan Khan's street and Berka Makan street.

Two new parallel conservancy lanes to new cross street No. III will also be opened as shown on plan. They are denoted as Q. and A. K. C.

Six small conservancy lanes between the two new parallel conservancy lanes will also be opened. They are marked H. F. C. P. B. and D. on plan.

Block Nos. 18, 19, 21 and 22 and 29 and 30.—New conservancy lanes and roads in these Blocks were opened under the Scheme sanctioned for No. I Drainage area. The construction of drains only will be handled now.

Block No. 31.—The insanitary houses in this Block will be removed and the existing two conservancy lanes will be widened, and drains constructed, and two new conservancy lanes No. I and IV are proposed to be opened.

Block No. 24.—The two parallel lanes to Gouligar's street will be widened, and seven new conservancy lanes running north to south between Gouligar's street and Kamani Darwaza road will be opened.

Block No. 23.—The insanitary houses will be entirely removed, and a new road parallel to Gouligar street will run through the Block.

- Block No. 25.**—The chief work in this Block will be the removal of houses condemned as being unfit for occupation. Two new conservancy lanes running north to south between Davood Khan's street and Dee's road will be opened.
- Block No. 9.**—Seven conservancy lanes parallel to Ragi Mandi street and two lanes running north to south parallel to Kaliyaman temple street will be opened.
- Block No. 8.**—This Block is proposed to be cut up into convenient small blocks to thoroughly drain the whole area. This necessitates the opening of six conservancy lanes east to west, and five from north to south.
- Block No. 7.**—Several condemned insanitary houses will be removed. The most important work will be making the new road from Mochi Ghaut street to Togari street marked No. 6. Four minor conservancy lanes will also be opened.
- Block No. 4.**—In this Block also as in the case of No. 7 all the houses condemned as being unfit for occupation will be removed.
Three new conservancy lanes will be opened at the thickly populated portion of the Block.
- Block No. 5.**—The chief work in this Block is to secure a good cart road along the Main drain which runs parallel to Mochi Ghaut street. Other needful nine conservancy lanes will also be opened; in addition to the removal of insanitary houses.
- Block No. 6.**—In this Block also, the foot-path along the "Main Drain" will be widened to allow conservancy carts. The thickly populated portions will be conserved by opening newly, fourteen conservancy lanes, suitably situated, as marked on plan.
- Block No. 26.**—A new conservancy lane parallel to Doddapete street marked (A) and another cross lane marked (B) will be made.
- Block No. 27.**—A new conservancy lane proposed in Block No. 26 marked (A) will be continued to the Railway Station road. A cross lane from Doddapete road to join the new conservancy lane will be made.
- Block No. 28.**—All the narrow houses facing the Doddapete road are proposed to be conserved by opening a new conservancy lane instead of allowing the sewage to enter the Main road. This lane will run between Doddapete Main road and Halladakeri street. A new road from Halladakeri road to the Church road through Normal School compound will be made, and the Main drain will run along the side of it.
- Block No. 2.**—This Block is the most thickly populated portion of the whole "Drainage area." Five conservancy lanes parallel to the Railway Station road, and five lanes across will be opened between Railway Station road and Hospital road. Properties will be acquired to open ten conservancy lanes as marked on plan, to conserve the portion between Hospital road and Ravai street.
- Block No. 3.**—The most important improvement in this Block will be to remove all the insanitary houses along the Sayaji Rao road. This area will be re-allotted for building convenient houses, with shops utilising the "Frontage" already built. A new conservancy lane will be opened parallel to the Railway Station road from Benki Nawab's street to Kaliyaman temple street. Minor cross lanes marked A, C, D, E, G, H, and I will also be opened.

ਉਤਪਤੀ

We have the honor to submit
our report on the proposed improvement
of No. 2 Drainage area of the Igarka City

1. Description.--No.2 Brigade Area lies generally between Fakhri Bazar Khan Street and the Hospital Road, and comprises the greater part of Lashkar e Azaizi and the whole of Mundy Mohalla. The area of about seven acres contains a population of 10,800 or 20% of the total population of the City. Police barracks located in the locality number 60 men. The population consists of ^{Ammu}~~Muslims~~, ~~Vedals~~ Hindus, Sikhs, Europeans, Armenians, Bahais, and Afghans, Ambedkar's caste and give about 1,200 men.

2.. Present security conditions make unnecessary to describe at length the security condition of the area, as we have dealt with it fully in our previous reports and memoranda. We can only say that the security situation is good in the majority of the area, and that the security situation is good in the majority of the area.

Phobias, Christians, Holyars
Magars

of the service on military lines. It is
 essential the location of public buildings
 and schools be suitable places. It also
 recommended the filling in of the city
 with for a distance of 100 yards and
 further on to the north.

It is also recommended that the
 improvement of the city be made in order
 to the service of the city.

The same also,
 report of the committee:
